AGIA™ Virtual Office Communications Package

Linkscope AGIA™ Virtual Office Package

Communications in the Palm of Your Hands™

Linkscope AGIA™ Virtual Office (Advanced Groupware Internet Application)

The Linkscope AGIA™ Virtual Office Package is a monthly service specifically targeted at the Maritime industry that provides robust voice and data communications compatible with many different types of satellite, wireless, or landline Internet connections.

Premium Voice Calls Dramatic Cost Savings

A fixed monthly fee provides for an extended ranges of services, while voice calls are billed on a per minute basis at discount rates. USA calls cost as low as \$0.05 USD per minute and Euro calls are typically \$0.10 USD per minute, varying upwards with tariff. A \$100 USD calling credit is applied to all calls for a month often resulting in an effective \$0 phone bill for customers of moderate usage.

Linkscope AGIA™ Basic Features

- VOIP Phone Lines
- Virtual Forwarding Phone Numbers
- Virtual Fax Lines
- Email Accounts
- Websites
- Groupware File Sharing
- Remote Document Backup
- Global Coverage

Made for Maritime - Customized For You

Every Linkscope AGIA™ installation is custom tailored to our customers needs. We understand the demands of running a business from a few square meters of space on the bridge. Whether it is a need to clear customs or please a charter guest we can help you consolidate and organize your work in ways you have never been able to before.

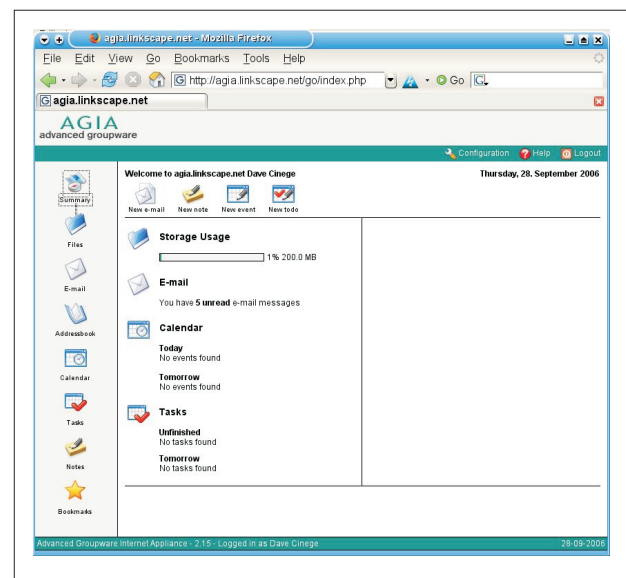

- Do you want a virtual Euro phone number to forward to your USA phone as a courtesy line?
- Incoming Fax alerts sent to your cell phone?
- Ship notifications and schedules easily put on the Web for public viewing?

Linkscope AGIA™ can do all this and much more.

Get the Most Out of Your VSAT Internet Connection

Linkscope AGIA™ is the perfect complement to your vessels existing VSAT Internet service. Even if you already have a VOIP phone line, Linkscope AGIA™ will provide a large increase in functionality, flexibility, and enhanced cost savings. Linkscope AGIA™ is also not locked in to your VSAT, and can utilize any of your backup Internet connections to keep you up and running, with no changes to phone numbers. For vessels requiring new VSAT service, or that simply demand the very best VSAT performance, Linkscope Typhoon™ VSAT Internet service can be installed for you.

AGIA ONLINE SUMMARY

Powerful Groupware and E-Mail for staying organized

Consistent Communications

Linkscope AGIA™ Virtual Office is a provider neutral service that will operate over any high speed Internet connection allowing you to maintain a consistent path of communications and Internet service regardless of your location. Simply put: your phone numbers will never change.

Fully Managed and Totally Supported

The Marine environment offers no room for error. Linkscope AGIA™ service is monitored in real time and managed to provide you with the highest level of service possible. We deal directly with a limited high-end market base allowing us to treat every customer as an individual. Any issues you may have will be addressed directly by your personal technical engineer, not a call center.

A Company That Can Deliver

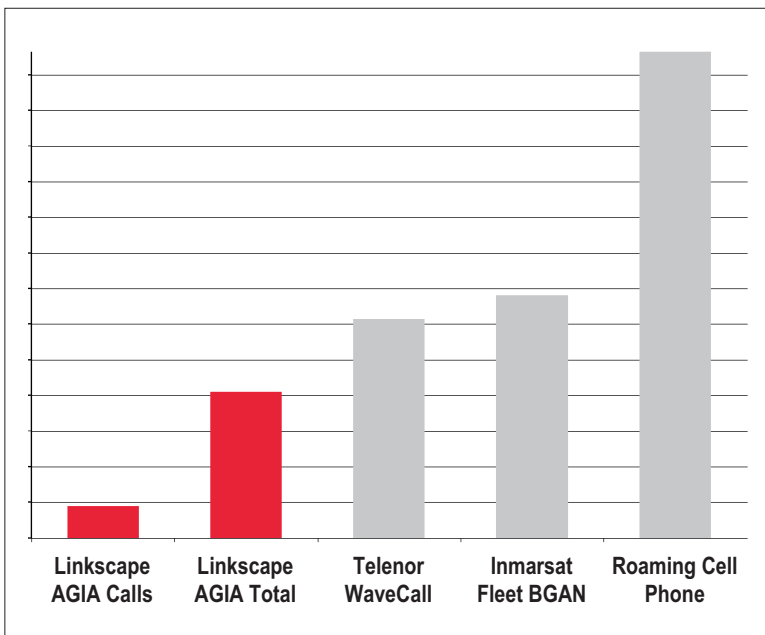

There are several well known companies that provide maritime satellite telecom service, but have struggled with their entry into the Internet market. Unable to expand their offerings and support personal resources, their customers have been left with a limited scope of service and issues of quality control.

You won't have this with Linkscope. Linkscope has always been about Internet service provision and delivering the caliber of support it demands. We've been doing it for over a decade. Beyond our robust line of standard services, our highly skilled software and network engineering team can make nearly any custom solution a reality, with a level of quality control currently unmatched in the industry.

About Linkscape

Linkscape Internet Services was founded in 1997 and has continued to evolve into specialized Internet services provision for vertical markets. Since 2004 Linkscape has focused on Internet provision and communications in the Luxury Super Yacht and Commercial Shipping Maritime sectors. Our goal has always been to provide our community of users with the highest level of service possible. All of our clients deserve a job done right, the first time, every time, and no one can appreciate this more than the maritime customer.

The Linkscape Global Network

The Linkscape network consists of multiple redundant teleport earth stations and network hubs located in the United States, Germany, and Switzerland. Our principal network operations centers are located in Austria, a stable jurisdiction offering our customers strong data privacy. Linkscape maintains points of contact in Fort Lauderdale, Malibu, London, and Rome.
